

Metadata for Carbon Monoxide Poisoning Deaths

Identification Information

Carbon Monoxide Poisoning Deaths		
Origin	Status	Update
EPHT Program Manager	Complete	Annually
Published Date: 20180327	Begin Date: 20000101	End Date: 20161231
Abstract		
This data set contains the number and rates of Carbon Monoxide deaths in the state of Iowa. Measures include unintentional fire-related poisoning, unintentional non-fire related poisoning, and undetermined source poisoning. Data are stratified by age group, sex, and county.		
Purpose		
This data set is intended to provide data for the Iowa Public Health Tracking Portal, consistent with the guidance for creating carbon monoxide mortality Nationally Consistent Data Measures (NCDMs).		
Supplementary Information		
The data contained in this dataset is collected by the Iowa Department of Public Health Vital Records Program. This dataset contains confidential information. Small numbers suppression has been applied to data available on the public portal.

Access Constraints

Access to the records within this dataset requires permission from the Iowa Department of Public Health. Unsuppressed aggregate measures are available on the Secure Portal; an application for secure portal access is available at <https://pht.idph.state.ia.us/Help/Pages/Secure-Access.aspx>.

Use Constraints

Do not attempt to learn the identity of any person included in the data, and do not combine this data with other data for the purpose of matching records to identify individuals. Do not disclose or make use of the identity of any person or establishment discovered inadvertently and report the discovery to the Iowa Department of Public Health through the contact information provided below. These data cannot be used for commercial purposes. Do not imply or state, either in written or oral form, that interpretations based on the data are those of the original data sources, the Iowa Department of Public Health, or the Centers for Disease Control and Prevention unless the data user and data sources are formally collaborating and have received written permission to do so. Acknowledge, in all reports or presentations based on these data, the original source of the data, the Iowa Department of Public Health.

Additional Information

Data

Physicians and medical examiners assign the cause of death through a system that allows for the possibility of multiple causes. Demographic information on the certificates, such as age, race, Hispanic ethnicity, gender, educational attainment, marital status, and occupation, is recorded by the funeral director based on information provided by an informant, usually a family member, or, in the absence of an informant, based on observation or omitted.

Lineage

Data extracted from source data files and processed into Data Cube

Date: 20170701

Data Overview

This file/dataset includes the number of carbon monoxide deaths in the state of Iowa. Deaths include fire-related unintentional poisoning, non-fire related unintentional poisoning, and undetermined source poisoning.
