Abstract		
This data set contains case counts and rates of Carbon monoxide inpatient hospitalizations among Iowa Residents. These include unintentional fire-related poisoning, unintentional non-fire related poisoning, and undetermined source poisoning. Data are stratified by age group, sex, and county.		
Purpose		
This data set is intended to provide measures for the Iowa Public Health Tracking Portal, consistent with the guidance for creating carbon monoxide hospitalization Nationally Consistent Data Measures (NCDMs).		
Supplementary Information		
The data contained in this dataset is collected by the Iowa Hospital Association on behalf of the Iowa Department of Public Health in accordance with Iowa Code section 135.166. This dataset contains confidential information. Small numbers suppression has been applied to data available on the public portal. The Tracking Network is using hospital admission dates while other public health programs use the hospital discharge dates to count cases. This may cause a difference in rates between the Tracking Network and other public health Web sites.

Access Constraints		
Access to the records within this dataset requires permission from the Iowa Department of Public Health. Unsuppressed aggregate measures are available on the Secure Portal; an application for secure portal access is available at https://pht.idph.state.ia.us/Help/Pages/Secure-Access.aspx .		
Use Constraints		
IDPH is authorized to use this data for the following purposes: (1) to conduct public health surveillance activities and to evaluate public health surveillance programs; (2) to conduct analysis of acute and chronic conditions in order to improve public health and the quality of health services in Iowa; (3) to identify cases of reportable diseases and other reportable health conditions; (4) to provide statistical and aggregate data for statewide and local public health strategic planning and to inform the design and evaluation of public health programs, policies, and interventions; (5) to satisfy the mandates of federally funded grants and programs and other grants and programs that require monitoring of health data; and (6) to provide aggregate data upon request from the public as authorized by law. Do not attempt to learn the identity of any person included in the data, and do not combine this data with other data for the purpose of matching records to identify individuals. Do not disclose or make use of the identity of any person or establishment discovered inadvertently and report the discovery to the Iowa Department of Public Health through the contact information provided below. These data cannot be used for commercial purposes. Do not imply or state, either in written or oral form, that interpretations based on the data are those of the original data sources, the Iowa Department of Public Health, or the Centers for Disease Control and Prevention unless the data user and data sources are formally collaborating and have received written permission to do so. Acknowledge, in all reports or presentations based on these data, the original source of the data, the Iowa Department of Public Health, the Iowa Hospital Association, and the Centers for Disease Control and Prevention.

Additional Information

Data

These data do not include data from federal hospitals, non-acute care hospitals, and patients treated outside of their state of residence. Therefore, there is underreporting of CO poisoning hospitalizations.

Lineage

Latest year of data imported from source files provided by Iowa Hospital Association and appended to previous years data

Date: 20170701

Data Overview

This file/dataset contains counts and rates of carbon monoxide hospitalizations among Iowa residents. Case counts include fire-related unintentional poisoning, non-fire related unintentional poisoning, and undetermined source poisoning. This indicator uses data collected by hospitals. It can be used to identify trends and patterns in the occurrence of CO hospitalizations across time and space. The data are organized by different variables to help estimate the number of hospital admissions in different time periods, age groups, and geographic areas.

Distribution Liability		
These data were provided by the Iowa Department of Public Health; the findings and conclusions based on these data are the sole responsibility of the author(s) of the study. Although every effort has been made to ensure the accuracy of the material contained in this dataset and the Iowa EPHT Network Portal,		

complete accuracy cannot be guaranteed. The Iowa Department of Public Health is not responsible for any errors or misprints contained herein and cannot accept any responsibility whatsoever for loss or damage occasioned or claimed to have been occasioned, in part or in full, as a consequence of any person acting, or refraining from acting, as a result of a matter contained within the Iowa EPHT Network Portal.

Custom Order Process

Request for data that are within the use constraints of the agreement between IDPH and the Iowa Hospital Association can be submitted the the Public Health Data Program. Additional information available at <http://idph.iowa.gov/PublicHealthData>. Request for custom data sets or research determined to be outside the use constraints must be submitted to the Iowa Hospital Association. Additional information is available online at <http://www.ihaonline.org/Information/Inpatient-Outpatient-Database/Data-Request>. Price quotes and timetables for completion will be given before orders are filled. All data sales must be pre-paid. Contact InformationCenter@IHAonline.org to place an order.
